0.4 ± 3 mm
0.4-12 mm
8 ± 60 mm
Solutions for high quality machining

Reliable for the highest productivity

Possibility of integration in NetLine
Solutions for high quality machining

TECHNOLOGY FOR OPTIMUM EDGE BANDING

STARTOUCH CONTROL SYSTEM (OPT)
- Intuitive and easy to use thanks to its customised graphics and one touch mode
- Large dimensioned display (12”)
- Simple when choosing the machining required
- “TELESOLVE” (opt) for diagnostic and on-line service

ORION 110 CONTROL SYSTEM
(supplied as a standard feature on the entire range)
- Basic and intuitive for error-free machining
- Memory capacity with up to 60 working programs
- Large characters for easy reading

BAR CODE READER (OPT)
- No errors with automatic program recall
“iGLUE” KIT (OPT)

- **Optimum finishing including delicate panels.** The locking of the glue pot copying operation in the last panel section avoids contact of the roller with the panel.
- Automatic exclusion of the glue pot in the case of non-use of the group or stopping of the feed track.

---

**“ED SYSTEM” EXHAUST SYSTEM**

- Increased cleaning of panels thanks to optimum chips suction with the “ED-SYSTEM” function which couples the encircling exhaust hood to the suitable container with a filter for long chips.

---

**GLUE POT SUBSTITUTION**

- Rapid changeover of the glue colour/type of glue to be applied.
- The “Fastlock” rapid unlocking system allows for fast glue pot substitution, while the “double thermoregulation system” manages two working temperatures in order to apply both EVA and Polyurethane thermosetting adhesives (opt).
ALL WHAT YOU EXPECT FROM AN EDGE BANDER… AND MORE

- **Panel Spacer (Opt)**
  - Panel introduction into the machine with the correct space between panels
  - The distance between the panels is automatically optimised according to the selected operating groups

- **Blower for Panel Cleaning**
  - Optimum glue adhesion with the cleaning of the machined surface

- **Infrared Ceramic Lamp (Opt)**
  - Improved glue adhesion due to heating of the surface to be glued

Reliable for high productivity
RT-E PANEL EDGE TRIMMING GROUP

- Provides a perfect surface for gluing the edge
- ED SYSTEM high efficiency exhaust outlets
- Constant removal on the entire panel length with the copying devices kit (opt)

AAR ANTI-ADHESIVE GROUP (OPT)

- It ensures the highest finishing quality by preventing the glue sticking to the upper and lower panel surfaces

VC 800 GLUING GROUP

- It is possible to edge material strips up to 12 mm thickness and coiled edges up to 3 mm
- Pre-melting device for the automatic feed of glue to the glue pot (opt), it is advisable for panels which require a high consumption of glue
- Optimum gluing of solid wood edges with VC 1000 glue pot that allows the reverse rotation of the glue roller (kit 12 mm opt)
ALL WHAT YOU EXPECT FROM AN EDGE BANDER... AND MORE

K/SEL END CUTTING GROUP
- The best finishing quality thanks to the motors sliding on two independent guides
- Rapid set-up between straight and angled cutting with the automatic independent tilting of the motors (opt)
- Horizontal movement of the group in order to leave an exceeding edge that ensures an optimum finish of the Round group (opt)

RS/K IN-LINE TRIMMING GROUP
- For the trimming of a solid wood edging or the removal of the exceeding edge thus providing the following chamfering operation
- ED SYSTEM high efficiency exhaust outlets

RI/800 TRIMMING GROUP
- The very best finishing quality with the rotating front and vertical copying discs
- Rapid machine changeover between thin, radius and solid wood edges with the 2 and 3 pneumatic positions kit (opt)
- Solid wood changeover without any operator intervention, thanks to the powered axes installed on the front copying devices (opt)
- ED-SYSTEM high efficiency exhaust hoods

NESTING COPYING DEVICES (OPT)
- No difficulty when finishing panels already processed with the “nesting” working cycle, through the suitable copying devices to be mounted on the upper part of the trimming and edge scraping groups

2 POSITIONS KIT

3 POSITIONS KIT
2 MOTORS ROUND GROUP

- Perfect rounding and trimming of straight, chamfered and post-formed panels
- Rounding angles with 16 m/min track speed
- ED-SYSTEM high efficiency exhaust hoods

SCM PATENT

“4 EDGE” KIT (OPT)

- Automatic positioning of the group for the machining of 3 thin edges and 1 radius edge

MACHINING EXAMPLES WITH THE 2 MOTORS ROUND GROUP
ALL WHAT YOU EXPECT FROM AN EDGE BANDER... AND MORE

- **RCL GLUE SCRAPING GROUP** (OPT)
  - Eliminates any excess glue on the panel surface
  - Optimum use with soft/post formed panels thanks to the independent intervention of the two tools

- **RCA/2C GLUE SCRAPING GROUP** (OPT)
  - Eliminates any excess glue on the panel surface
  - Best finishing quality even on the panel edges due to the two rotating copying discs

- **RAS/1000 EDGE SCRAPING GROUP** (OPT)
  - Rapid and easy work changeover of the radius edge thanks to the substitution of the cutter-head, complete with rotating copying discs
  - For the finishing of the PVC/ABS radius edge
  - The group is complete with extraction hood with suitable container with filter for long chips

- **RAS/S 2P EDGE SCRAPING GROUP** (OPT)
  - Automatic work changeover of the radius edge through the two tool pneumatic positions
  - For the finishing of the PVC/ABS radius edge
  - The group is complete with large dimensioned extraction hood with suitable container with filter for long chips
K-100 SPINDLE MOULDER GROUP
▶ It carries out through grooves or timed grooving on the front or lower panel sides
▶ The group is complete with front copying devices and exhaust hood

PANEL MOVEMENT SYSTEM
▶ Perfect straight movement of the chain and panel holding due to the large dimensioned chain (1-1/4")
▶ Automatic lubrication of the blocks

SPN BRUSHING GROUP (OPT)
▶ Allows panel cleaning and polishing
▶ Easy adjustment with the hand wheel supplied with the group

SPRAY-MIST DEVICE FOR EDGE FINISHING (OPT)
▶ It improves the panel cleaning and the polishing of the PVC/ABS edge

HOT AIR BLOWER FOR PVC/ABS EDGES (OPT)
▶ It reactivates the colour of the PVC/ABS edges
PREPARATION

INTERIOR DESIGN

3D DESIGN

- xcab
  - 3D project of a sequence of cabinets, Definition of the cutting list to be optimised, Boring routing program generation, Extremely easy to use

- giotto
  - 3D project of a complete room furniture (including under roof), Rendering, Direct export of the cutting list to be optimised, Boring routing program generation and hardware management, Preinstalled, customisable and parametric furniture database

- imos
  - 3D project of a complete room furniture, Rendering, Direct export of the cutting list to be optimised, Boring routing program generation and hardware management, Automatic generation of product catalogue, Integrable with company management IT system

3D PROJECT OF A SEQUENCE OF CABINETS

DEFINITION OF THE CUTTING LIST TO BE OPTIMISED

BORING ROUTING PROGRAM GENERATION

PARAMETRIC FURNITURE DATABASE

PROGRAMMING

- ultracut
  - Panel optimisation, Cutting guide (navigator) for L’invincibile saw

- ottimo
  - Multi-job optimisation, Costs and times definition, Material stock management

- xylog plus
  - Boring and routing schemes programming, Machine functions and barcode management, Shared by all SCM CNC machines

- flashnest
  - Nesting optimisation, Easy to learn and to use

PROCESS COMPLETION

3 AXIS CNC BORING ROUTING

- cyflex
  - All boring operations and grooving, Safety enclosure on working unit instead of floor mats, Dust extraction on the base, CNC SCM / Xilog Plus on PC Office

- tech
  - All boring operations and grooving, Outside profiling and routing, Horizontal group and HSK 63F 11kW (S6) SCM electrospindle with Vector axis CNC SCM / Xilog Plus on PC Office, Protection Bumpers to optimize alternate work process (no safety mats required)

- pratix
  - Nesting processing, Vertical boring operation, Outside profiling and routing

CURVED EDGING

- olimpic m
  - Curved and Straight Panels, Thickness up to 3 mm, Edge height up to 80 mm
OPTIMISE TIME AND RESOURCES! SELECT THE SOFTWARE AND SCM MACHINES MEETING YOUR INVESTMENT AND PRODUCTION CAPACITY AND YOU’LL HAVE ALL THE ADVANTAGES OF THE INTEGRATED PROCESS.

INTEGRATED PRODUCTION

CUTTING

- seghe circolari
- sigma
- pratix

Post-forming, parallel cutting, angular cutting by means of FULL SUPPORT_Touch screen control and operator’s assistance with graphic help_Wireless data transmission between digital readouts of squaring rule stops and full support

STRAIGHT EDGING

- olimpic k
- olimpic s

Solid wood up to 12 mm, thin edges and ABS up to R 3 mm_Soft/postformed panels_“StarTouch” control system with 12” touch screen display_Pur glue applicable

Solid wood up to 22 mm, thin edges and ABS up to R 3 mm_Soft/postformed panels_Winedge PC control system_Pur glue applicable

CALIBRATING SANDING

- sandya

Solid wood calibrating, sanding and finishing_Calibrating of chipboard, m.d.f. and other wooden panels_Veneered panels presanding, sanding and finishing_Logic touch screen electronic programmer for the total machine control

ASSEMBLING

- assembla e-p

Manual loading for small lots and customised furniture manufacturing_Open rear structure, with unloading support roller and photocells safety bar_Manual or automatic movements, controlled from 3,8”touch screen

INTEGRATED PROCESS

Nesting processing_Vertical boring operation_Outside profiling and routing

Grooves execution, slots execution device, postforming_Saw carriage up to 135m/min and pusher up to 70 m/min_Automatic detecting system for length, width and panel thickness_Automatic blades locking with selector

Post-forming, parallel cutting, angular cutting by means of FULL SUPPORT_Touch screen control and operator’s assistance with graphic help_Wireless data transmission between digital readouts of squaring rule stops and full support

Solid wood up to 12 mm, thin edges and ABS up to R 3 mm_Soft/postformed panels_“StarTouch” control system with 12” touch screen display_Pur glue applicable

Solid wood up to 22 mm, thin edges and ABS up to R 3 mm_Soft/postformed panels_Winedge PC control system_Pur glue applicable
